

Review of HIRLAM/HARMONIE SURFEX-related activities

Ekaterina Kourzeneva*,
Mariken Homleid, Tomas Landelius,
Magnus Lindskog, Patrick Samuelsson,
Laura Rontu, Homa Keyrollahpour, Carl
Fortelius, Margarita Shoulga, Ulf Andrae,
Yurii Batrak

SURFEX SC meeting
2 Apr. 2015

Contents

Ongoing and planned R&D

General

Soil and vegetation

Snow

Sea ice

Lakes

Urban

Physiography

Technical developments and documentation

Points to discuss

General: **HARMONIE** Climatology

HCLIM project includes SURFEX7.3:

- ISBA-DIF, ES-3L, FLake
- Prognostic sea ice (new)
- Modified SURFEX further for ALARO compability and snow prep step
- Many other modifications:

<https://hirlam.org/trac/wiki/HarmonieClimate>

General discussion in HIRLAM/HARMONIE: snow-soil-vegetation, model + DA

Goal: to run advanced snow schemes in operational

- MEB is now possible with FR
Thanks to Aaron Boon!
- Plans to test FR+ES+MEB in HARMONIE
- More serious plans for Soil DA for DIF!

Soil Scheme	Soil DA	Snow scheme	Snow-veg scheme	Snow DA	Application	
FR	OI/EKF +OI(Canari)	D95	none	snowOI(Canari)	NWP	
		ES	MEB	{{snowOI/VAR/EKF}} +snowOI(Canari)	NWP	
			none	{{snowOI/VAR/EKF}} +snowOI(Canari)	NWP	
		CRO	MEB	{{snowOI/VAR/EKF}} +snowOI(Canari)	NWP	
			none	{{snowOI/VAR/EKF}} +snowOI(Canari)	NWP	
		none	D95	none	none	climate
	ES		MEB	none	climate	
			none	none	climate	
	CRO		MEB	none	climate	
			none	none	climate	
	DIF		{{OI/VAR/EKF}} +OI(Canari)	D95	none	snowOI(Canari)
		ES		MEB	{{snowOI/VAR/EKF}} +snowOI(Canari)	NWP
none				{{snowOI/VAR/EKF}} +snowOI(Canari)	NWP	
CRO		MEB		{{snowOI/VAR/EKF}} +snowOI(Canari)	NWP	
		none		{{snowOI/VAR/EKF}} +snowOI(Canari)	NWP	
none		D95		none	none	climate
		ES	MEB	none	climate	
			none	none	climate	
		CRO	MEB	none	climate	
			none	none	climate	

R&D: Soil and vegetation, DA

Plans:

- Assimilation of satellite-based measurements of the hydrosphere - towards a combined meteorological-hydrological forecasting system - raw radiance and backscatter data (satellite radiances from AMSR2/GCOM-W1, MIRAS/SMOS and SAR/Sentinel-1)
- **IM**proving **PR**edictions and management of hydrological **EX**tremes - **IMP**REX - satellite based surface products, the surface soil moisture from ASCAT

R&D: snow modeling and DA

- Problems with permanent snow in Iceland were reported (melting)
- SE obs from NESDIS are too smooth for HARMONIE
- experiments using the probability of snow from satellite ... - planned
- SE from Land-SAF, or Globsnow, or MODIS, SWE from microwave retrievals using HUT model - planned
- EKF for SWE - planned

COST ES1404 started! The working group on snow DA: a good overview, frames for cooperation and generating ideas

SURFEX SC meeting
2 Apr. 2015

R&D: Ice modeling

- Simple ice scheme
 - $H = \text{const}$
 - heat diffusion 4L
 - snow on iceis technically possible
 - the ice fraction is from analysis
- **HIGHTSI** - planned and ongoing

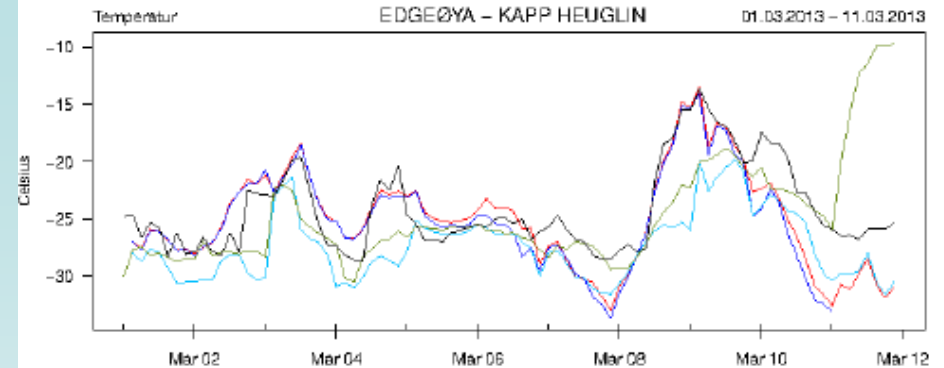

R&D: Ice modeling

SURFEX SC meeting
2 Apr. 2015

AA_SICE_SNOW_3L_01 (1006)

	Mitt	Middel	Maks	Std	N
synop: 00, ..., 21/3	-28.7	-24.2	-13.6	3.7	88
AA_SICE_SNOW: 00+3, ..., +24/3	-33	-25.1	-13.4	4.3	87
AA_SICE_SNOW_S: 00+3, ..., +24/3	-33.7	-25	-14.1	4.2	80
AA_REF: 00+3, ..., +24/3	-31.6	-27.4	-19.8	3	87
AROME_Norway:					0
AROME_Svalbard: 00+3, ..., +24/3	-30.6	-24.8	-9.7	4.6	88

	Middelkoll	Skilfall	RMSE	MAE	Maks.abs.fall	N
AA_SICE_SNOW - synop	-0.9	2.6	2.8	2.2	6.7	87
AA_SICE_SNOW_S - synop	-1	2.8	2.9	2.2	7.7	80
AA_REF - synop	-3.2	2.5	4	3.2	10.5	87
AROME_Svalbard - synop	-0.6	4.7	4.8	2.9	16.1	88

- tests over AROME Arctic domain
- SST and SIC fields in fiords need improvements

R&D: Lake modeling

- tests with PGD: problems with consistency of the lake depth and lake fraction fields were found
- GLDBv2 is included into SURFEX
- FLake in 2D - ongoing, planned
- to include the improved lake climatology into SURFEX and HARMONIE - ongoing, planned
- 1D experiments for Lake Kyyvesi to study the model error during different seasons

R&D: Lake DA

- in ver, with EKF:
 - a posteriori statistics, statistics of errors, bug fixes
 - testing with deep water temperature obs, include into SURFEX and HARMONIE - planned
- in hor: new structure functions for OI (different from SST) - ongoing

Name (longitude, latitude)	D (m)	I (%)	Name (longitude, latitude)	D (m)	I (%)
Kuivajärvi (23.9, 60.8)	2.2	94.8	Rehja-Nuasjärvi (28.0, 64.2)	8.5	95.5
Tuusulanjärvi (25.1, 60.4)	3.2	94.3	Vaskivesi (23.8, 62.1)	7.0	97.1
Pääjärvi 1 (24.5, 62.9)	3.8	96.6	Haukivesi (28.4, 62.1)	9.1	94.9
Pesiöjärvi (28.7, 64.9)	3.9	95.4	Kallavesi (27.7, 62.8)	9.7	96.3

Kevojärvi (27.0, 69.8)	7.0	98.0			

SURFEX SC meeting
2 Apr. 2015

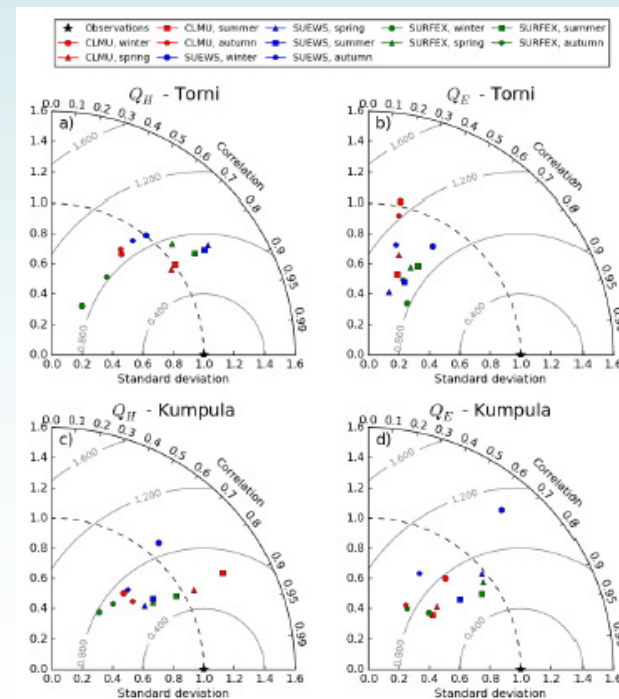

R&D: Urban modelling

Intercomparison study

-SURFEX (TEB), SUEWS (U Helsinki)
and CLM-U (KU Leuven)

- obs: year 2012,
SMEAR III tower
and Hotel Tornii
- fluxes,
much attention to
snow and
winter stability

SURFEX SC meeting
2 Apr. 2015

R&D: Urban modelling

The FMI urban weather forecasting system

A dream, January 28, 2015

C. Fortelius¹

¹Meteorological Research
Finnish Meteorological Institute

- ▶ Conditions of roads and pavements
- ▶ Heating demand, cooling demand
- ▶ Urban flooding
- ▶ Freezing and thawing of soil
- ▶ Local energy production: Solar, wind
- ▶ Urban planning, (e.g. building density, green roofs) and local interpretation climate scenarios

SURFEX SC meeting
2 Apr. 2015

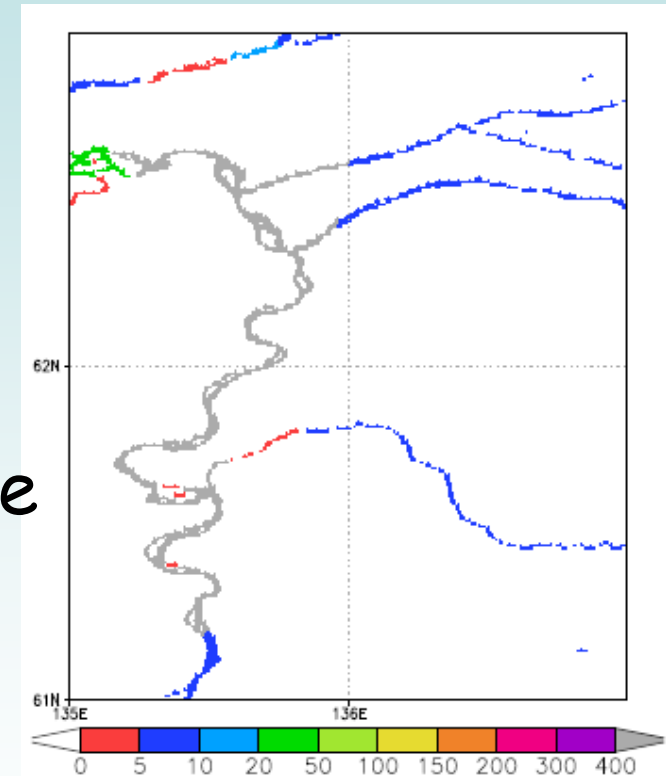

R&D: orographic radiation parametrization

- CALL **ORORAD** in `COUPLING_SURF_ATM_n` before calling the tile loop
- Include into the **MUSC** environment

R&D: Physiography

- Geospa web meeting in December: ideas for cooperation
- GLDBv2: problems for large rivers detected, fixing is ongoing
- GLDBv3: indirect estimates of the mean lake depth for the Southern Hemisphere - almost done
- GLDB: first steps towards fine resolution, Globcover

R&D: Physiography

- Philosophy of fractions of tiles within Covers
=> inconsistency problems with other datasets, such as the lake database.
Solution: don't use this approach for lakes.

	Cover type	Current partition	Remarks	Suggestions
124	Warm tropical wetlands	nature – 80% inland water – 20%	-	nature – 100 %
125	Subpolar wetlands	nature – 80% inland water – 20%	-	nature – 100 %
176	Rice fields	nature – 80% inland water – 20%	“False” cover, does not exist on the binary map	-
238	Temperate wetlands	nature – 80% inland water – 20%	“False” cover, does not exist on the binary map	-
239	Subpolar wetlands	nature – 80% inland water – 20%	Exist only in Iceland	nature – 100 %
240	Peat bogs	nature – 80% inland water – 20%	“False” cover, does not exist on the binary map	-
241	Salines and salt marshes	nature – 50% inland water – 50%	“False” cover, does not exist on the binary map	-
242	Intertidal flats	nature – 50% sea water – 50%	“False” cover, does not exist on the binary map	-
243	Coastal lagoons	sea water – 100%	“False” cover, does not exist on the binary map	-
249	INLAND WATERS1	inland water – 100%	Polders and coastal lagoons	sea water – 100%
550	UNDEFINED1	nature – 45% inland water – 55%	In Europe: sea water near the coast, coastal lagoons, river estuaries. In Ukraine and Turkey: lakes. In Asia:	Several cover fixes in binary map: from 550 to 2 or from 550 to the major cover type in the

SURFEX SC meeting
2 Apr. 2015

R&D: Physiography

- "Water body" covers were carefully examined:
 - Some Covers are poorly defined
- Solution:
to fix the binary cover map,
done,
Should be coordinated
with other developments!

*Curonian lagoon, Covers types contain
from 2 to 50% of land*

SURFEX SC meeting
2 Apr. 2015

Technical

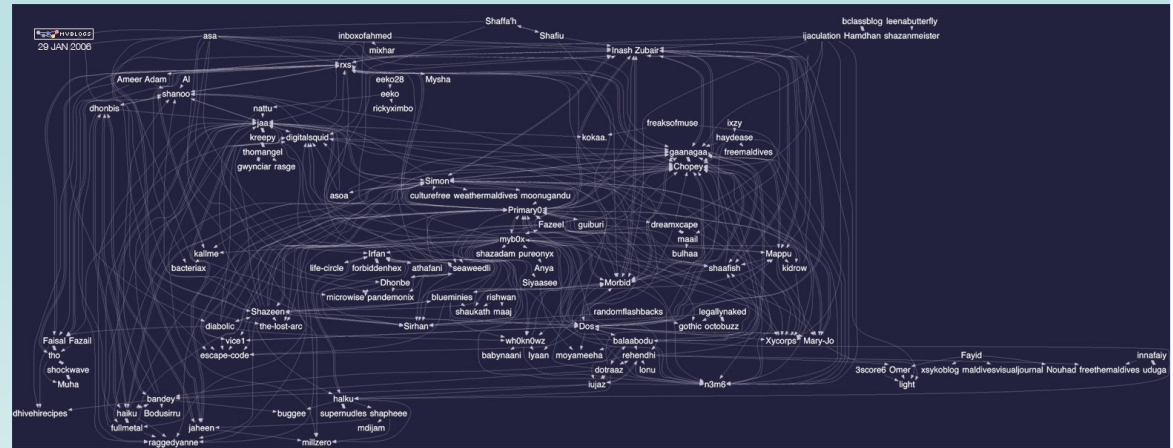

- Changes of an initial state from ECMWF with PREP and related changes in GRIB2 handling
- FORTRAN 2003 features: for the discussion
- For svn or git - to use more possibilities, as in HIRLAM/HARMONIE: for the discussion

Documentation

- Status of various options: tested? in which mode? : for the discussion
- Contact people on different topics: for the discussion
- Default values in SURFEX: recommended or bogus? : for the discussion

Documentation

- Code structure?
- DOXYGEN: lists, graph ...
- to unravel the graph: plain routines, utils, blocks - ongoing
