

*List of items of importance discussed at HMG/CSSI meetings in Brussels (no order of priority)*

- Observation pre-processing
- ODB internal HARMONIE user-support
- Moisture assimilation
- Parallel dynamics activities (VFE, improved mass conservation properties, dyn-phys interactions)
- Rotated Mercator LSIDG-type set-up
- Validation of physics development and related interfacing issues
- SURFEX climate file creation
- Physics perturbation issue in EPS
- ALADIN contribution to GLAMEPS: issue of billing units at ECMWF and ECMWF boundary files software
- Coordination of the maintenance networking
- Question of versioning of new releases => namelists as core issue
- The working group issues (HARMONIE for Academia, regularised physics for 4D-Var; SURFEX consistency issues [HIRLAM ↔ ALADIN; upper air ↔ surface], GLAMEPS)
- Issues outcoming from scientific discussion during the Workshop
