

# Ongoing activities (1)

- **Participation to the next EWGLAM/SRNWP meeting (Helsinki, 8-11 October 2012) :**
  - Review talk : summary of activities from last year or summary of the main outcomes from the lake workshop (Katya or Laura)
  - Dedicated session : MetOffice (B. Macpherson), HIRLAM (E. Kourzeneva or L. Rontu), ALADIN (Y. Bouteloup), COSMO (??), ECMWF (J.-N. Thépaut) : **did you provide a title ?** No time for discussions

# Ongoing activities (2)

- **Lake database** : continuation of Margarita Choulga activities (PhD). Fundings needed (to be provided by ECMWF: action J. Onvlee). *Support letter from PM C-SRNWP*
- **Lake validation datasets** : link from SRNWP site
- **COLOBOC database** : current status (J.-M. Bettems). Availability outside SRNWP ? SRNWP validation exercise (selected stations, most recent year, output from operational configurations)

# Ongoing activities (3)

- Next lake workshop planned in 2014 (Portugal ? Germany ?) : could be organized as an SRNWP workshop (financial support from EUMETNET ?)
- Update of the content of the documentation of surface models and data assimilation (web page) -> to be finalized

# Future of C-SRNWP

- Current programme will finish by the end of 2012
- Proposal for a new C-SRNWP programme (2013-2017) with G. Boloni (OMSZ) as PM as part of the « Forecasting Programme » (EUMETCAL, EMMA, C-SRNWP, Nowcasting, EurEPS)
- New aspects : more common R&D projects (?), increased links with SESAR, WEZARD, THORPEX/ Europe, Universities and End-users
- ET structure should remain but JFM wants to step down
- EUMETNET programmes discussed at STAC/FPAC in October and presented at GA in November
