Status data assimilation in Austria

Florian Meier, Phillip Scheffknecht, Clemens Wastl, Florian Weidle,
Christoph Wittmann, Stefan Schneider, Jasmin Vural

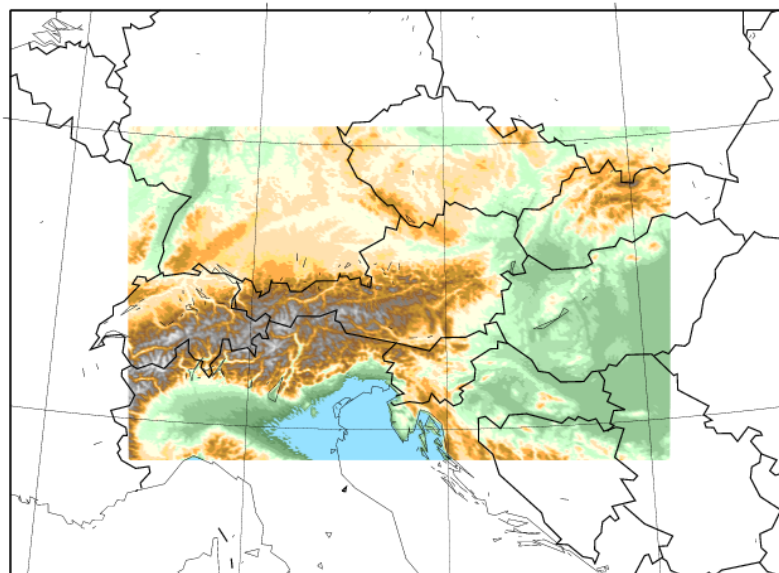

Significant changes in operations during 2019

- ▶ C-LAEF (AROME-EPS) becomes operational end 2019
- ▶ Hourly AROME-RUC 1.2km becomes operational end 2019
- ▶ ALARO-0 4.8km will

Observations used in AROME/C-LAEF(no sat):

Obstype	Parameter
Synop+Tawes+Ship	U10m,V10m, RH2m,T2m, Z
AMDAR	U, V, T
GEOWIND	U, V (WVCL1/2,WVMW1, IR3, VIS3)
TEMP	U, V, T, Z, Q
PILOT	U, V
MSG-SEVIRI	WV radiances
NOAA18/19/MetOp-A,-B	AMSU-A, AMSU-B, MHS, HIRS
MetOp-A	IASI
MetOp-A	U10m, V10m ASCAT ocean winds
LAKE from Lake Constance from measurement	25m Interpolated inside OIMAIN

CANARI settings: REF_A=190km, LVARSIGO=F, LMESCAN=T, LCORRF=T

REF_S_T2=5.0,REF_S_H2=0.3,RCLIMCA=0.045,RCT2SY=3.9,

RCH2SY=2.5

OROLIM=3800.,ORODIF=1650. -> no change since last year

Additional observations in AROME-RUC:

Obstype	Parameter
SYNOP national (OPLACE)	U10m,V10m, RH2m,T2m, Z
MODE-S ARSO/CHMI (MRAR) KNMI/AT	U, V, T +AMDAR-Q
RADAR AT/SI/D HR/CZ/SK/F (1 station)	DOW+REF +saturation of profiles
GNSS (AT national)	ZTD
(ATMS SUOMI+NOAA20)	Radiances ch1-3,5-14,16-22
INCA	RR5min via LHN
TAWES+10/20/30min	T2m/RH2m/U10m/V10m via FDDA Nudging
T-Lake (Fertoe/Balaton) pseudo obs	TS_WATER

CANARI settings: REF_A=110km, LVARSIGO=F, LMESCAN=T,
LCORRF=T

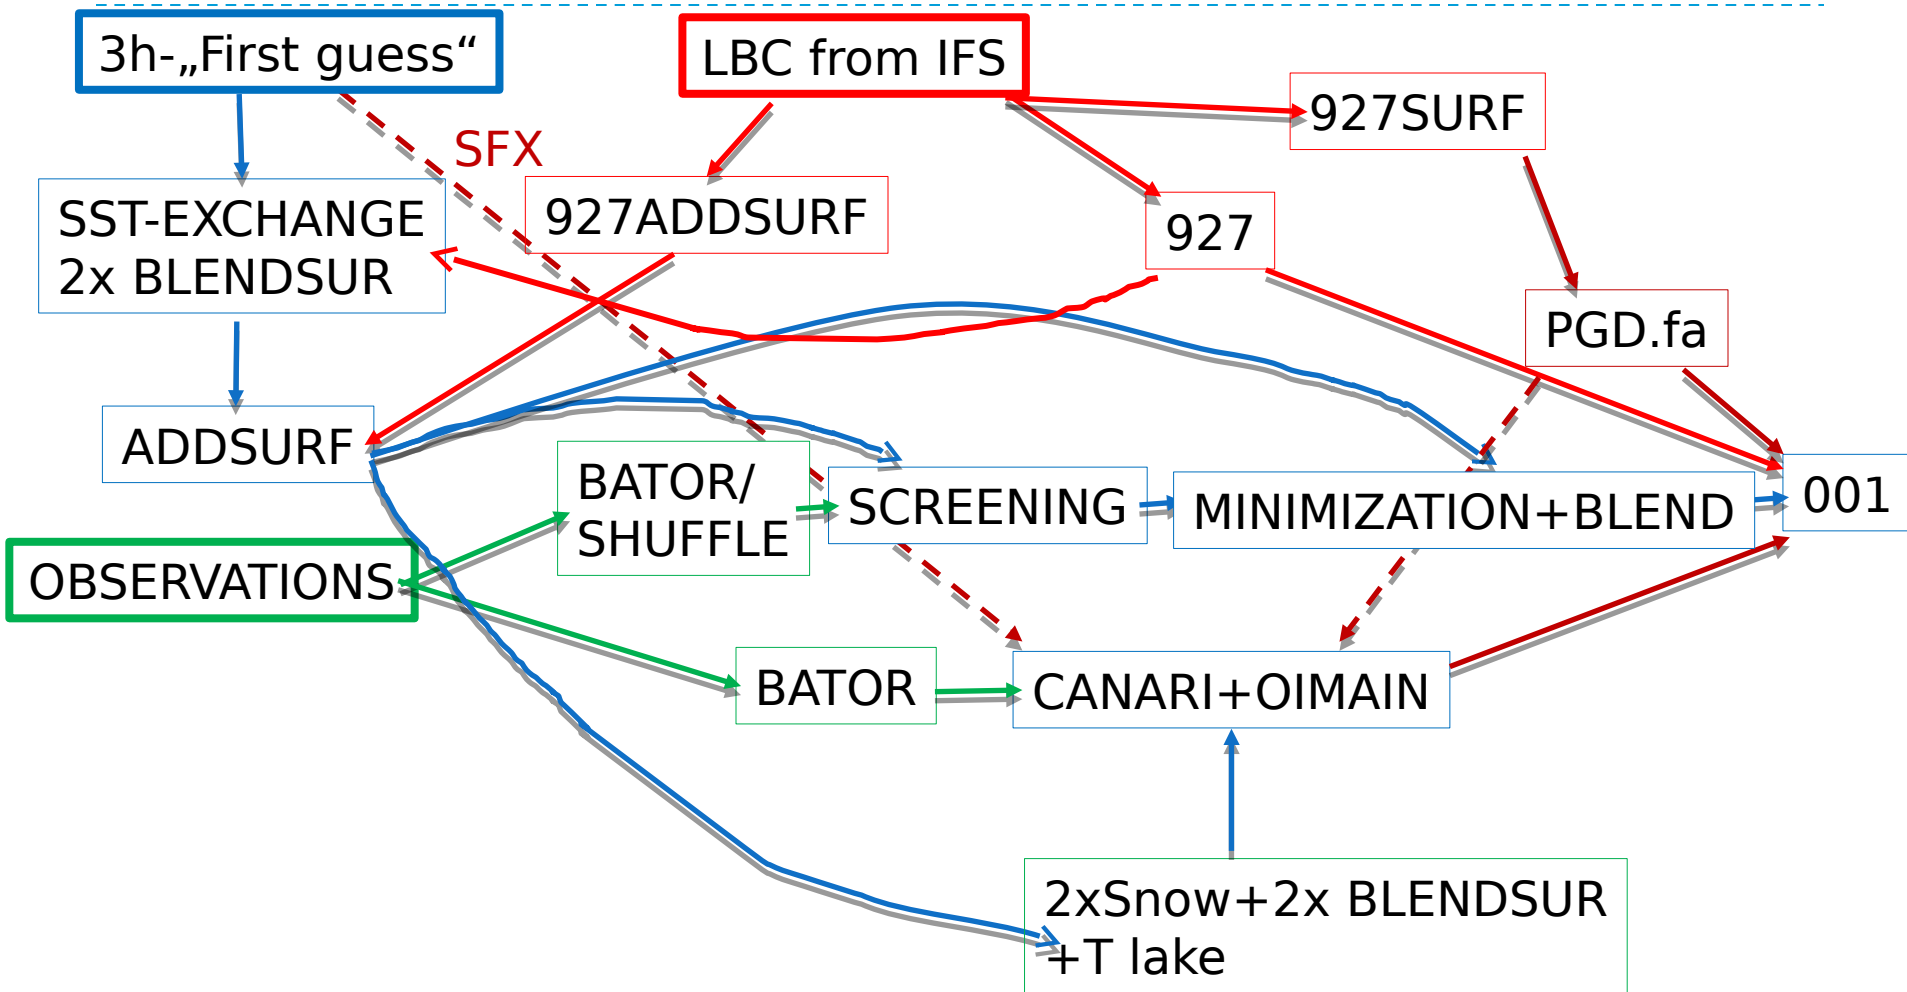

REF_S_T2=5.0,REF_S_H2=0.3,RCLIMCA=0.045,RCT2SY=3.9,

RCH2SY=2.5

OROLIM=3800.,ORODIF=1650.

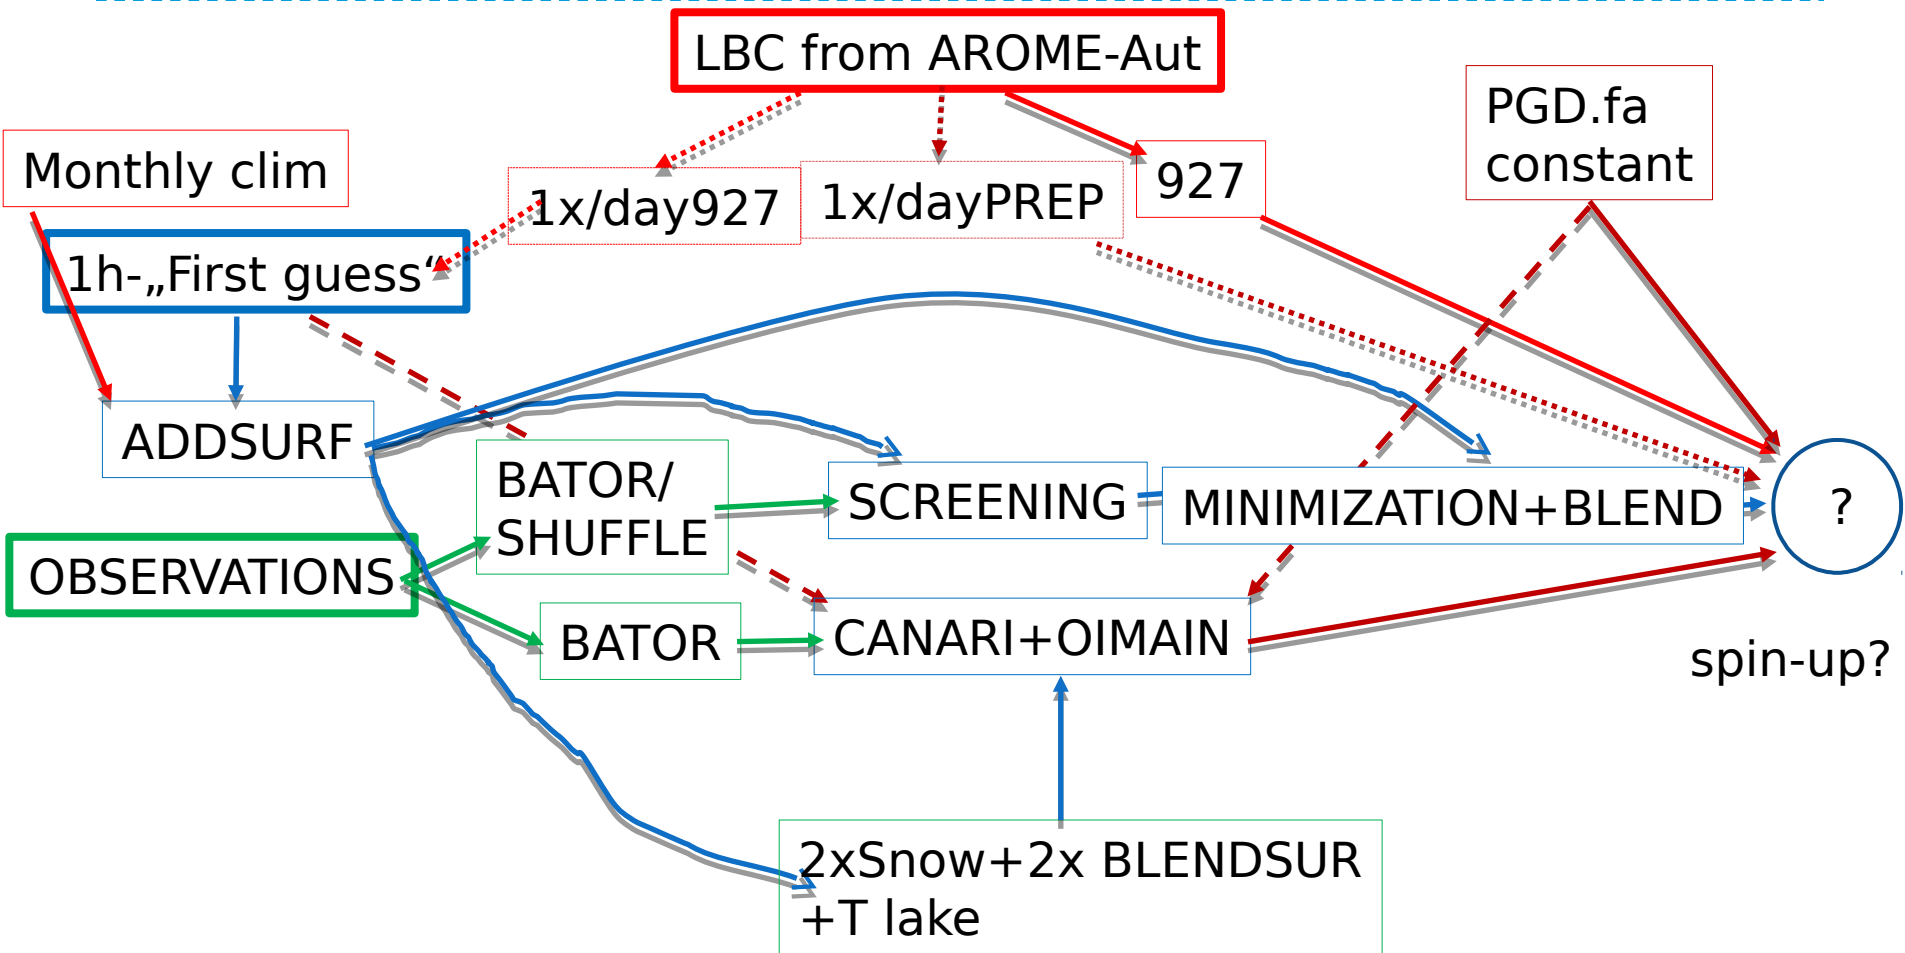

AROME-Aut structure (3 hourly cycle)

no separated assimilation(long cutoff)/production cycle; window +/-90min

AROME-RUC structure part A

window -90/+30min additional observations

Incremental Analysis Update IAU

- ▶ Idea: Bloom et al. Mon Wea Rev.1996
- ▶ „Nudging of analysis“
- ▶ adds during integration in a defined time window each timestep a part of the analysis increment to the first guess
- ▶ Implemented by MF P. Brousseau in AROME cy43t2; (backphased to cycle 40t1)
- ▶ Can be used to 1. add increment/use observations later during the forecast (MF) ->short window
- ▶ 2. or to smooth increment in time and so filter spin-up (ZAMG) ->long window
- ▶ Needs guess+analysis;
- ▶ switches: LIAU to switch IAU on, TSTARTIAU starttime of window in s ->TSTOPIAU endtime of window, ALPHAIAU amplification factor multiplied with the increment per timestep

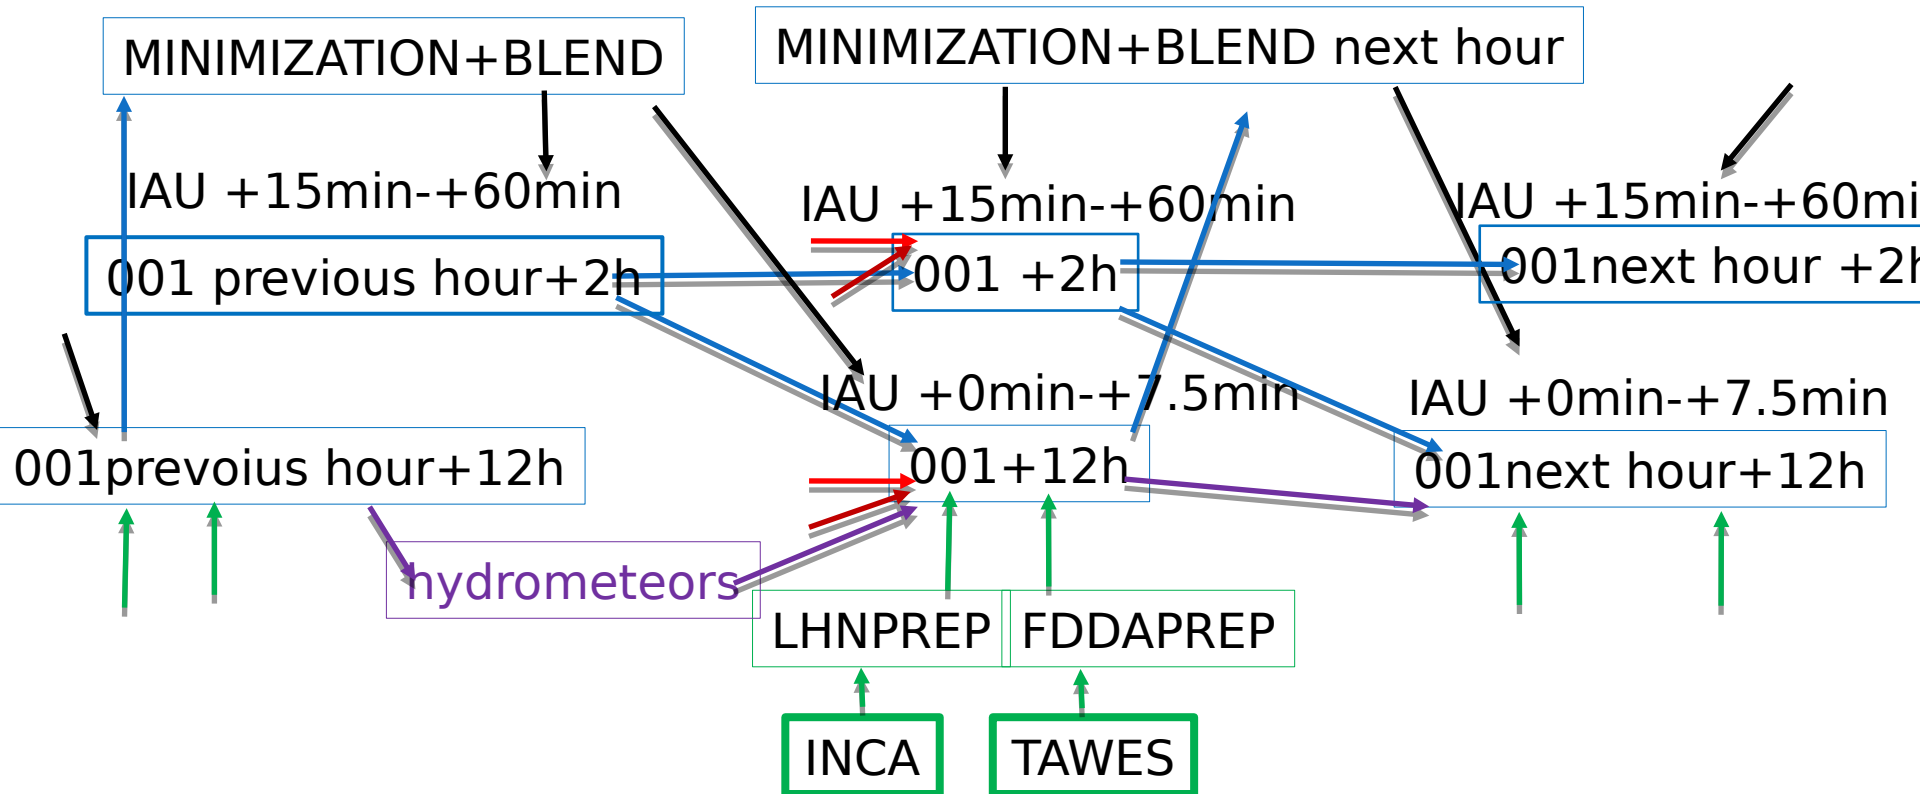

analysis

IAU window

AROME-RUC structure part B

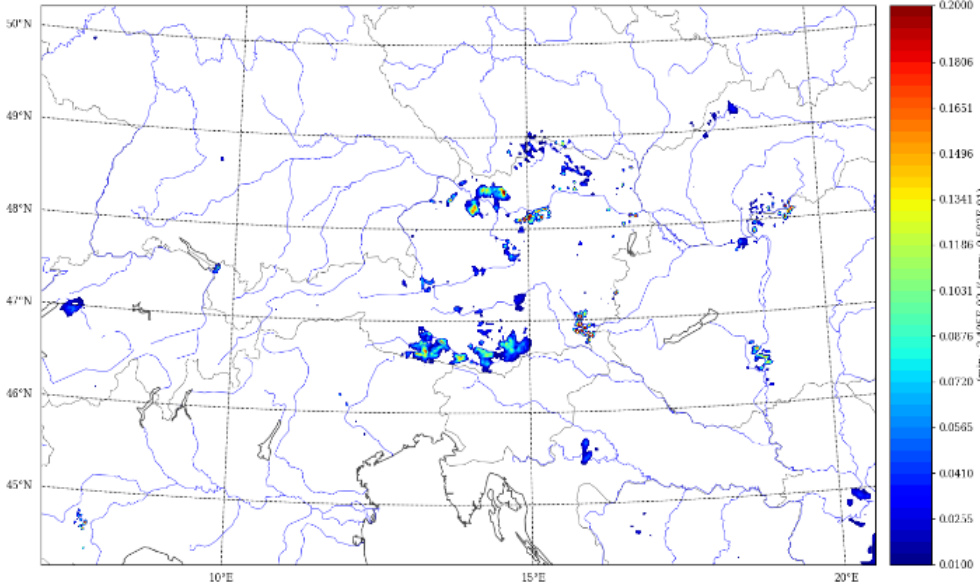

Reduce Spin-up

two hourly cycles one using minimization via IAU at 0-5min the other at 15-60min IAU with long window seems to affect hydrometeors

IAU deteriorates hydrometeors ->additional blending

ICMSHAROM-0001 : S085RAIN
2019-09-04 06:00:00

MXMINI999+0000_blend : S085RAIN
2019-09-04 06:00:00

S085RAIN after +15min-60min IAU S085RAIN after +1h run with LHN+FD DA-Nud

Observation was rain=0 on that day

STD assimilation in AROME-RUC (F. Weidle)

Regional Cooperation for

Europe

Operator from KNMI backphased to cy40t1 export

Single obs Q increments for two elevations

Relative Degree of Freedom for Signal (DFS/observations)

GPS-RO OSSE (Phillip Scheffknecht)

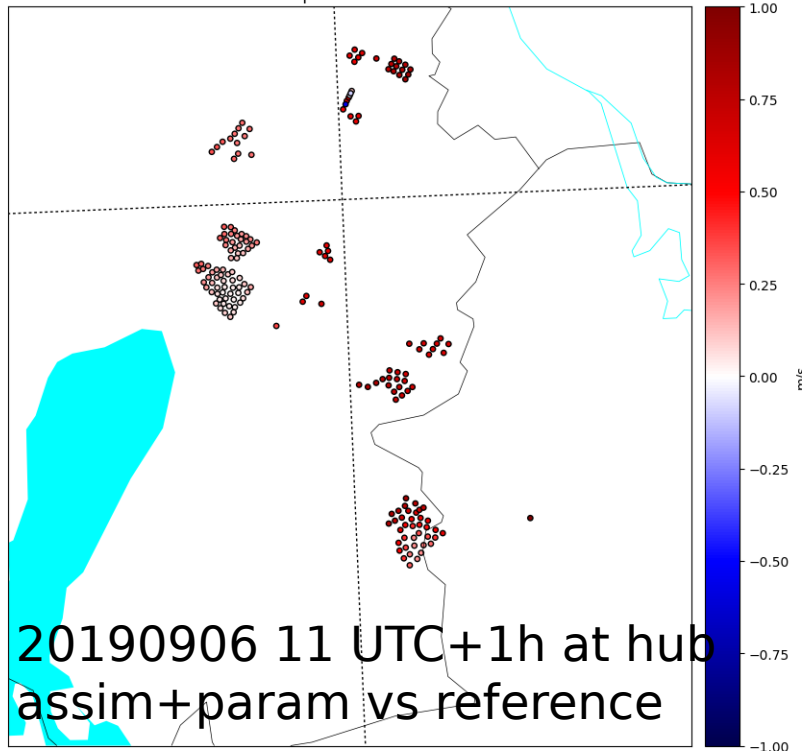

Positive impact on wind and temperature above 500hPa; below mixed

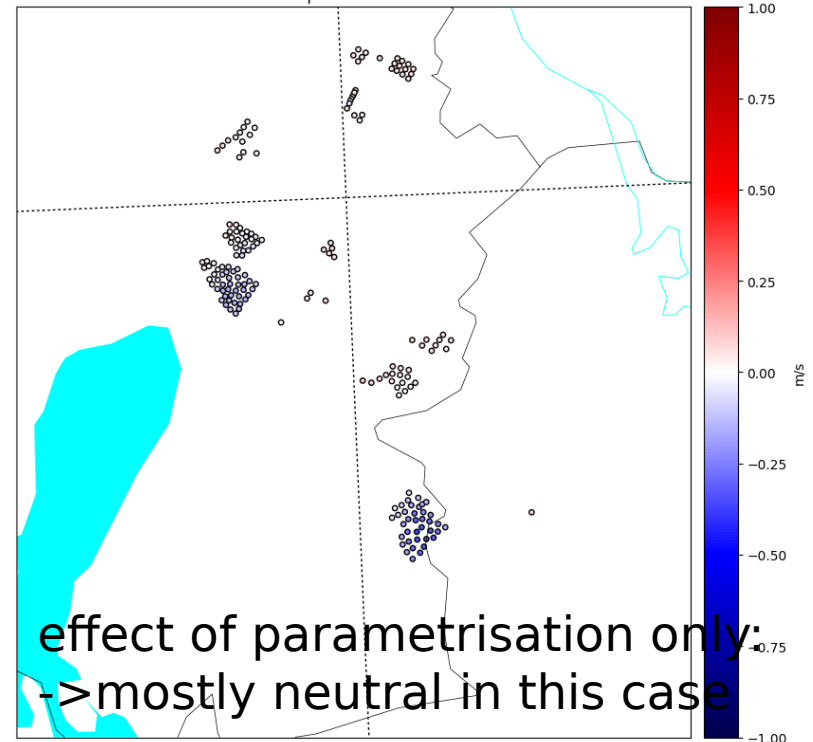

windfarms in AROME-RUC (about 200 turbines)

- QC based on deviation of measured wind and power from power curve
-> turbine in regular mode
- Blacklisting of wind turbines with large bias or standard deviation (12 turbines)
- Parameterisation of turbine effects on the environment (approach of Fitch et al. 2012)
->U, V, TKE tendencies based on turbine type, height, diameter and wind
- New pre-processing (Python) to handle large number of turbines
- Assimilate SCADA wind (temperature also possible, but measurement only 0 digit prec

V SCADA improvement of abs value

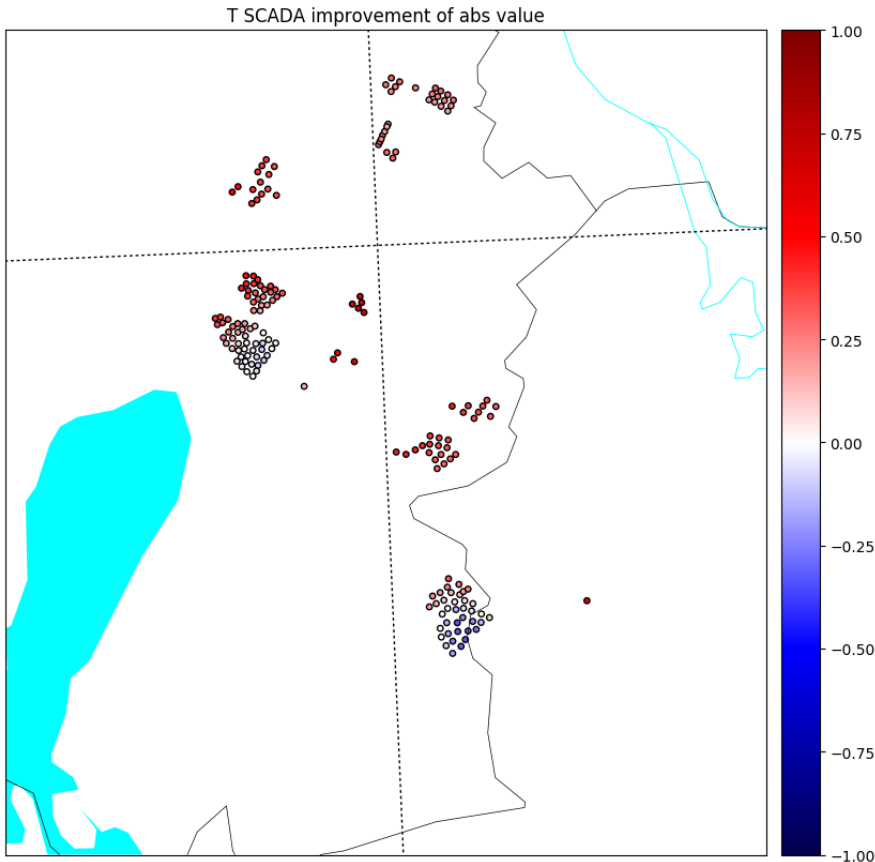

V SCADA improvement of abs value

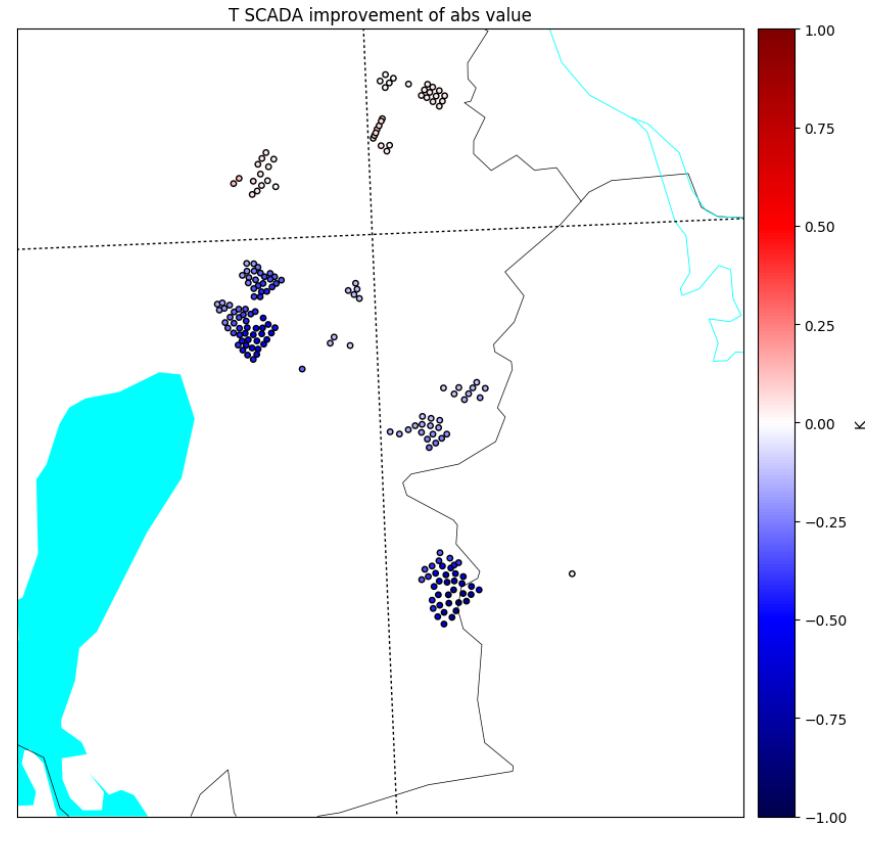

Observation about 3.5m/s from 335°

effect of windfarm wind assimilation on temperature

assim+ param vs reference

param only vs reference

In this case parametrisation has neutral to negative impact, while assimilation is beneficial for V and T

difference in V 6.9.2019 11 UTC+1h

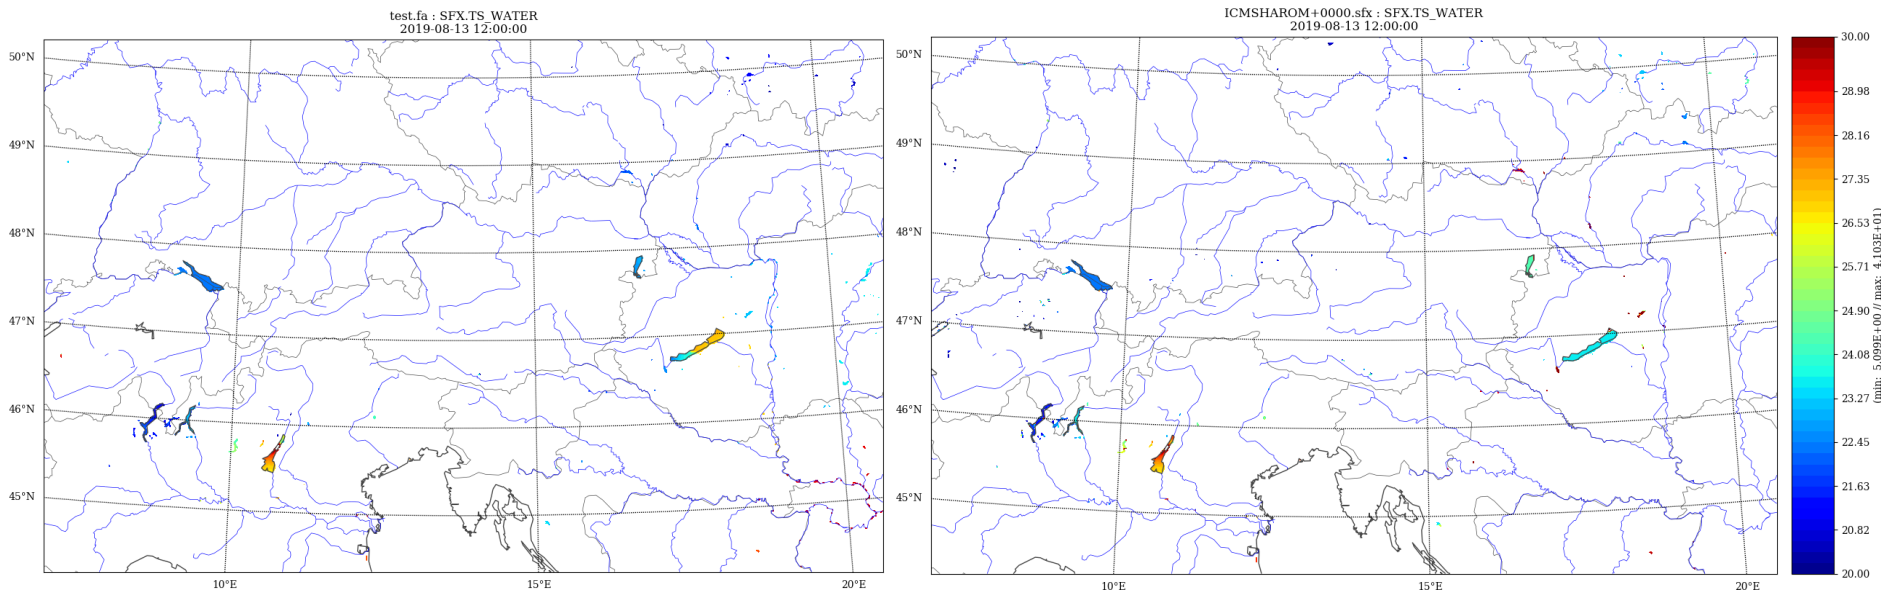

reference-(assim+parameterized farms)
difference due to assimilation and
Parametrisation of windfarms

param-(assim+param)
difference only due to
assimilation

Lake temperatures from SYNOP T2m

- ▶ Fertoe: Podersdorf 11084 assume 8h mean T2m=T-Lake
- ▶ Balaton: Siofok 12935 assume 12h mean T2m=T-Lake

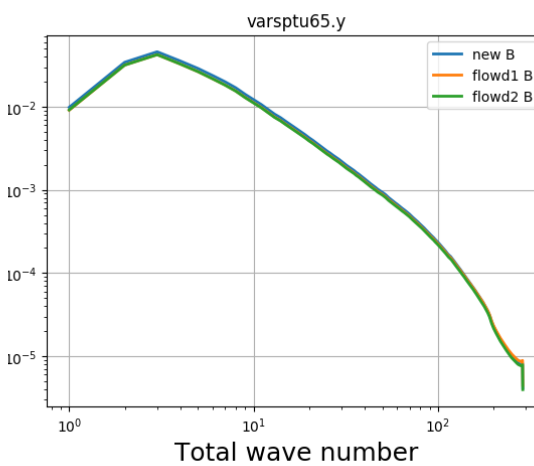

T2mfertoe=24°C Twaterobs=23°C
T2m Balaton=24°C Twaterobs=26°C
