- From now on, our firewall requires to use ncftp or gftp to have access to our machines by PARME.
- Kerberos ftp and /usr/bin/ftp do not work anymore.
- On top of YUKI, TORI is still accessible with the same login but your old password may differ from the one used with YUKI.

THE ALADIN NEWSLETTER

The next 3 slides show the number of anonymous contributions per topic per issue .
As for claret, we have some vintage years (few and far between) and lesser ones.

Is it worthwhile to carry on with the present format?

Methinks ... but you will do the thinking

The iron enters into my soul

«from the cradle to the grave?»

I do not mind telling you that my morale is closely following the number of contributions, but what of it.

Things have come to a pretty pass and to publish it is becoming a drag. The grapes are sour indeed.

Suggestions to improve the Newsletter are welcomed. Should we drop some sections? Have it only once a year? Give it up altogether? There is no end of ???

Thank you for being ever so patient.
